

DCI/ICS 84-3544  
9 April 1984

MEMORANDUM FOR: David Y. McManis  
National Intelligence Officer for Warning

FROM: [REDACTED]  
Director, Intelligence Community Staff

25X1

SUBJECT: Community Budgeting and Programming in Support of  
Intelligence Warning Centers

REFERENCE: Your memorandum to DDCI, same subject, dtd 1 February 1984

DAVE

1. At the DDCI's request, we have looked at the proposals contained in your 1 February 1984 memorandum. While we see them as worthy of consideration in the FY 1986 NFIP, we have not been able, except in the case of the NOIWON upgrade, to find the best way to task responsibilities to one or another agency to undertake the definition, development and procurements involved in each of the projects. I would, therefore, ask that you, in your role as principal adviser to the DCI for the intelligence warning function and assisted by the Intelligence Warning Community, develop a plan for the multi-year upgrade of this function. [REDACTED]

25X1

2. You are requested to provide a plan which describes the problems, and outlines the best ways to solve the problems. Your group should define responsibilities for each of the five projects identified in your memorandum. The plan should identify which agency is responsible for which project to include project definition, system development and procurement, and also cost projections. Once we have the who, what, how much and when, we will be in a position to determine the appropriate source for funding. [REDACTED]
